SKILLS

JavaScript | CSS | Sass | Styled Components | React | React Native | Redux | PHP | Drupal | git | Webpack | Jira | APIs | Photoshop | MySQL | AWS

EXPERIENCE

UI Engineer   April 2018 - Present
NodeSource | Remote

UI development using React, Electron and Node.js
- Part of a three-person team building the beta-version of NCM Desktop, an electron app with a React UI and Node.js backend that makes npm more secure
- Led the engineering effort to add marketing tracking code to all our products
- UI development with React for a new web interface for purchasing our products
- Contributed to a shared component library used across the company

Full Stack Developer (Contract)   June 2015 - April 2018
HelloWorld Devs, SpaceView, Neologic | Portland, OR

- Complete redesign of an augmented reality iOS app built with React and Cordova/PhoneGap featuring improved UX, including support for multiple screen sizes
- Collaborated with designers and product owners on a React ecommerce startup acquired by Nike
- Lead developer on a React Native android app using Drupal REST api as the backend
- Lead developer on iqcu.com, a Drupal 8 site using REST api, geolocation, leaflet, and mapbox
- Senior Developer on a team building a large-scale Drupal 7 ecommerce site
- Sole developer on a custom WordPress plugin to return legislator contact information from the Google Civic API for a given address

Developer   Dec 2013 - June 2015
Metal Toad | Portland, OR

- Hired as a junior developer, helped structure and define the junior program, became its first graduate, and then took ownership of it
- Lead frontend developer for a Drupal-based portal for the largest distributor of organic foods in the US
- Primary developer on a project to make the Philadelphia Orchestra website responsive (hint: ask me about this one)
- DC Comics: all I did was maintenance work on it, but it's too cool not to mention

Web App Engineer   March 2013 - Dec 2013
CompanionLink Software | Portland, OR

- Created and maintained CompanionLink and DejaOffice marketing sites.
- Lead developer for a web-based CRM built in vanilla JavaScript

EDUCATION

Portland Community College | A.A.S Web Design & Development   2013
University of South Carolina | B.A. History   1997
